OMAN, EGYPT EXPLORE BILATERAL TIES TO MEET THE ASPIRATIONS OF PEOPLE

The talks session reviewed the distinguished relations binding Oman and Egypt

MUSCAT: His Majesty Sultan Haitham bin Tarik held an official session of talks with President Abdel Fattah el Sisi of the Arab Republic of Egypt at Al Alam Palace on Monday.

The session reviewed the march of the distinguished relations binding Oman and Egypt. It also explored areas of bilateral cooperation and ways of elevating them towards broader horizons

to realise the aspirations of the Omani and Egyptian peoples. During the session, the two leaders exchanged views on various issues of common interest, in light of the developments in the Arab and international arenas. The official session of talks was attended from the Omani side by His Highness Sayyid Fahd bin Mahmoud Al Said, Deputy Prime Minister for the Council of Ministers, His Highness Sayyid Shihab bin Tarik Al Said, Deputy Prime Minister for Defence Af-

Ship carrying detergent caught fire, 20 Indian crew members rescued

Times News Service

MUSCAT: Thousands of bags of detergent that scattered in the waters off Muscat came from a ship that sank outside the territorial waters of the Sultanate of Oman, on 5 June. The ship – which flew an Indian flag – carried 20 crew members, all Indian nationals, confirmed an official from the Environment Authority, adding that they were picked up by another cargo vessel near the site of the mishap, and taken to Sultan Qaboos Port. All the crew members have left for India. The ship was passing outside Omani territorial waters while sailing from one country to another. **>A2**

HONOUR

HM the Sultan confers Al Nu'man First Class Order on Hungarian ambassador

MUSCAT: His Majesty Sultan Haitham bin Tarik conferred the Order of Al Nu'man (First class) on Dr. Tibor Szatmari, Ambassador of the Republic of Hungary to the Sultanate of Oman.

Bilateral relations

The order reflects His Majesty the Sultan's recognition of the efforts of the ambassador in enhancing the bilateral relations between the two countries.

The order was handed over by His Highness Sayyid Asa'ad bin Tarik Al Said, Deputy Prime Minister for International Relations and Cooperation Affairs, Personal Representative of His Majesty the Sultan when he received the Hungarian ambassador in his office here today to bid him farewell at the end of his tour of duty.

The ambassador expressed his thanks to His Majesty the Sultan for the support extended to him during his tour of duty in Oman

from His Majesty, the Government and the Omani people, which enabled him to carry out his tasks.

He also expressed his best wishes of good health, happiness and long life to His Majesty the Sultan, wishing the Sultanate of Oman further development and growth under the wise leadership of His Majesty.

On his turn, HH Sayyid Asa'ad

expressed his utmost appreciation to the ambassador for the efforts he exerted in serving the relations between Oman and Hungary, wishing him permanent success and the people of his country further progress and prosperity.

The conferment ceremony was attended by the Secretary General and the two advisers at the Office of Sayyid Asa'ad. -ONA

DETERGENT CARGO IN SEA

< FROM A1 Volunteers help clean-up

"We received a report of the sinking of the ship at 4:50pm on 5 June," said Mamdouh bin Salem Al Marhoun, acting director of the Environment Authority's Environmental Emergency Centre. "We had sent a report to the required authorities to know more about the cargo of the boat, but unfortunately, they could not find out, as the ship had sunk by then."

After the ship sank, the cargo floated to the surface of the sea, and began floating towards the Omani coastline, particularly the region from Quriyat to Seeb. Many of the bags that came to the surface were discovered in this region, as well as the Daymaniyat Islands.

Most of the damage from the detergent and plastic waste has been seen in Quriyat, Al Hail, and the aforementioned islands. It was later found out that the majority of the consignment was detergent, as well as some tyres.

Reports of bags of detergent in Omani waters first began circulating when divers and tour groups near these areas saw them floating on the surface of the sea. Marine birds stood on some of the bags, pecking at them in an attempt to get them open, hoping it might contain something for them to eat.

"The detergent is going to cause huge damage to our ocean ecosystems, so we need to act fast to remove as much of it as possible," said Abdullah Al Maskari, a diving instructor in Oman. "Turtles and other marine animals will look at these bags and think they are jellyfish, because that makes up a part of their food, and they will attempt to eat these bags. This is going to cause a lot of problems for them. Furthermore, they could affect the coral formations in the sea, and this could have very adverse consequences."

A volunteer campaign to clean up the Daymaniyat Islands was organised on Saturday.

"We don't know the exact number of detergent bags at sea, but it is safe to say that they number in tens of thousands," Al Maskari said. "The detergent packets were stored in bigger packs, which when split open released hundreds of smaller ones, almost like a cluster bomb, and that magnifies their damage."

Al Marhoun from the Environment Authority added that no fish

or other maritime lives have been lost so far, but reports of marine deaths could surface in the coming days. "What is providing us some reassurance in this matter is that most of the bags are still closed, so they will be easy to remove, and cannot be accessed by marine animals for the time being," he said. "But as you know, 85 percent of maritime environmental pollution is because of plastic, which is what these bags are made from. This could cause marine animals to die, unfortunately, but we hope such incidents do not happen."

To assist with the cleanup, a volunteer campaign to clean up the Daymaniyat Islands was organised on Saturday, involving the participation of citizens, residents, government institutions and private authorities.

"We are also scanning certain areas like Sifah and Qurum to see if any bags have been found there, but no more than two or three were discovered in these locations," added Al Marhoun. "On Tuesday, we will run another campaign to clean the coastline from Seeb to Al Azaiba."

TWO-DAY VISIT

HM THE SULTAN WELCOMES EGYPTIAN PRESIDENT

MUSCAT: President Abdel Fattah el Sisi of the Arab Republic of Egypt arrived yesterday on an official visit to the Sultanate of Oman lasting two days.

His Majesty Sultan Haitham bin Tarik led the welcoming party for the Egyptian President. When the jet of President el Sisi touched ground at the Royal Airport, His Majesty the Sultan met the guest at the foot of the ramp, welcoming him and wishing him and the accompanying delegation a pleasant stay in Oman.

Along with His Majesty the Sultan, the Egyptian President was received by His Highness Sayyid Shihab bin Tarik Al Said, Deputy Prime Minister for Defence Affairs, Sayyid Khalid bin Hilal Al Busaidi, Minister of the Diwan of Royal Court, Gen. Sultan bin Mohammed Al Nu'mani, Minister of the Royal Office, Sayyid Hamoud bin Faisal Al Busaidi, Minister of Interior, Sayyid Badr bin Hamad Al Busaidi, Foreign Minister, Sultan bin Salim Al Habsi, Minister of Finance (Head of the Mission of Honour), Abdullah bin Nassir Al Rahbi, Ambassador of the Sultanate of Oman to the Arab Republic of Egypt and its Permanent Delegate to the Arab League, Khalid Radi, Ambassador of Egypt to Oman and members of the Mission of Honour, as well as members of the Egyptian Embassy in Muscat.

Then, His Majesty the Sultan and the Egyptian President proceeded to the reception hall, passing through two rows of the guard of honour of the Royal Guard of Oman (RGO).

After a short stay, the motorcade of His Majesty the Sultan and his guest, President Abdul Fattah el Sisi, left the Royal Airport heading to Al Alam Palace for an official reception ceremony.

Before the arrival of the main vehicle of the motorcade at Al Alam Palace, a squadron of cavalry lined the two sides of the road

heading to the gate of the palace.

Upon the arrival of the motorcade of His Majesty Sultan Haitham bin Tarik and President Abdul Fattah el Sisi at the entrance of Al Alam Palace, the RGO band played a welcoming tune to the accompaniment of trumpets, as the motorcade entered the courtyard of Al Alam Palace.

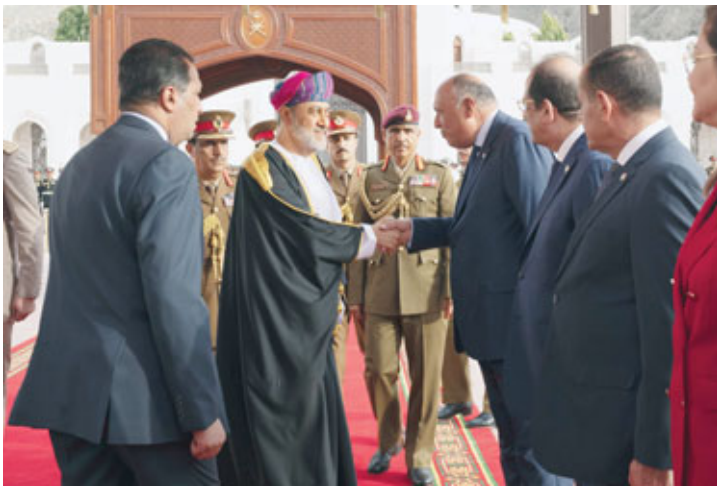

After that, His Majesty the Sultan accompanied the President of Egypt to the Dais of Honour where the National Anthem of the Arab Republic of Egypt was played, while the artillery fired a 21-gun salute for the guest.

Then, His Majesty the Sultan shook hands with members of the official delegation accompanying the Egyptian President, welcoming them and wishing them a pleasant stay. On his turn, President Abdul Fattah el Sisi shook hands with some members of the Royal Family, Chairman of the State Council, ministers, commanders of the Sultan's Armed Forces (SAF) and the Royal Oman Police (ROP).

After that, His Majesty the Sultan and the guest proceeded to the hall where they took Arabian coffee.

President Abdel Fattah el Sisi is accompanied during his visit by Sameh Shoukry, Foreign Minister, Major General Staff Ahmed Mohammed Ali, Chief of the President's Office, Dr. Hala El-Said, Minister of Planning and Economic Development, Major General Abbas Kamel, Chief of the Intelligence Service, Major General Mohsen Abdel Nabi, Director of the President's Office, Major General Staff Mustafa Shawkat, Commander of the Republican Guard Forces and Khalid Radi, Ambassador of Egypt to Oman.

The visit will explore various areas that serve the joint interests and meet aspirations of their peoples. It will also discuss a number of topics of concern to the two sides in light of the regional and international developments. -UNA

TOLIMA

Four killed, hundreds injured as bullfight stand collapses in Colombia

BOGOTA: Four people were killed and hundreds were injured after a stand collapsed during a bullfight in Colombia, local authorities said on Sunday.

The bullfight had been taking place in the municipality of El Espinal in the central Colombian district of Tolima and the regional health secretary Martha Palacios said an 18-month-old baby was among those who died.

What happened at the ring?

A three-story section of wooden stands filled with spectators collapsed, throwing dozens of people to the ground.

"Four people are among the dead at the present moment. Two women, one man and one minor," Tolima governor Jose Ricardo Orozco told Blu Radio.

"Around 30 people have been seriously injured... this is a preliminary report, injured people are still

being transferred," the governor added.

Orozco said the regional government would move to ban "corrales-jas," where local residents engage in amateur bullfighting.

Colombian newspaper El Tiem-

po reported that the bull from the fight had escaped the ring and that a state of alert had been declared in the municipality.

Local hospital overwhelmed
City council member Ivan Ferney

Rojas warned that the town's hospital and ambulance services were severely under pressure.

"We need support from neighboring hospitals and ambulances. Many people are yet to receive care," he said.

Provincial civil defense director Luis Fernando Velez told the local Caracol broadcaster that no-one remained trapped in the wreckage. Several people reported as missing have been found, he said.

Velez added that ambulances had been sent from the nearby cities of Ibague and Melgar to help the injured, with El Espinal's hospital becoming overwhelmed.

While around 30 people were initially reported seriously injured, late Sunday Tolima health secretary Martha Palacios that 322 people had gone to local public and private hospitals after the collapse seeking treatment. **OW**

INTER-KOREAN ISSUES

South Korea still committed to dialogue with North Korea

SEOUL: A South Korean minister in charge of inter-Korean affairs said Monday that the country was still committed to dialogue with the Democratic People's Republic of Korea (DPRK).

"We remain firmly committed to addressing all inter-Korean issues through dialogue," South

Korean Unification Minister Kwon Young-se told a press conference with foreign correspondents in Seoul. "In that sense, our government will engage in consistent efforts to achieve change in the inter-Korean relations, which are in a stalemate, through the embracing of the path of dialogue," said Kwon. **ANI**

G7 SUMMIT

G7 nations unite to address evolving global food crisis due to Russia-Ukraine conflict

SCHLOSS ELMAU: The Group of Seven (G7) leaders on Monday held discussions on the impact of Russia's war on food and energy supplies including the global economy and said the bloc is determined to support Ukraine in producing and exporting grain, oil, and other agricultural products as well as to address the causes of the evolving global food crisis.

They called upon Russia to cease, without condition, its attacks on agricultural and transport infrastructure and enable free passage of agricultural shipping from Ukrainian ports in the Black Sea. "We are united and determined to strongly support Ukraine in producing and exporting grain, oil, and other agricultural products and we will foster coordinated initiatives that promote global food security and address the causes of the evolving global food crisis," the Group of Seven said in the statement on Monday. In the G7 summit, leaders were in consensus that Russia bears enormous responsibility for rising threats to global food security as a result of the conflict.

"Russia's unprovoked assault on Ukraine - marked by bombing, blockades, and theft - has severely prevented Ukraine from exporting its agricultural products and is hampering its production capacity, leading to steep price rises and increasing global food insecurity for millions, especially those most vulnerable, such as

women and children," the Group of Seven said in the statement.

"We urgently call on Russia to cease, without condition, its attacks on agricultural and transport infrastructure and enable free passage of agricultural shipping from Ukrainian ports in the Black Sea," they said.

Ukraine is the "breadbasket of Europe" supplying 10 per cent of the world's wheat, 12-17 per cent of the world's maize and half of the world's sunflower oil. Twenty-five million tonnes of corn and wheat - the entire annual consumption of all the least developed countries - can't be exported and is currently at risk of rotting in Ukrainian silos.

This problem is due to worsen dramatically with July's harvest.

Russia's actions have driven up prices in countries like the UK and, while the UK is not directly dependent on Ukrainian grain exports, the ongoing blockade has placed 47 million people around the world on the brink of humanitarian disaster.

In addition to preventing grain from leaving Ukraine via the Black Sea - the route by which 96 per cent of Ukraine's grain has historically been exported, Russian attacks are disrupting rail exports.

Not only is Russia preventing Ukraine from exporting its grain, there is increasing evidence that Russia is stealing grain from Ukraine, smuggling it over the border to sell and

boost Putin's war coffers.

The leaders also agreed to further strengthen Ukraine's resilience by expanding cooperation in intelligence and information sharing, information security, as well as maritime security. "We will continue supporting Ukraine in defending its networks against cyber incidents and expand our cooperation in the fields of energy security, the safety and security of nuclear material and facilities, environmental, and water use issues," the statement added. On the second day of the summit in Elmau, the main focus of the G7 heads of state and government will be continued support for Ukraine. On Sunday, the Chancellor welcomed the heads of state and government of the G7 to the summit under the German presidency.

"We are united by our view of the world. We are also united by our belief in democracy and the rule of law," said Chancellor Scholz at the beginning of the summit.

In a first working session on Sunday, the heads of state and government of the G7 discussed global economic issues.

"All G7 countries are concerned about the crises that are currently to be overcome -- falling growth rates in some countries, rising inflation, shortages of raw materials and disruption to supply chains. These are no small challenges and it is therefore important to share responsibility," said Scholz. **ANI**

FUNERAL

Funeral held for British journalist murdered in the Amazon

RIO DE JANEIRO: Family members and friends paid their last respects on Sunday to British journalist Dom Phillips, who was murdered in the Amazon earlier this month along with Indigenous expert Bruno Pereira.

Phillips' wife Alessandra Sampaio, siblings Sian and Gareth, and brother-in-law Paul Sherwood attended the 57-year-old's funeral in Niteroi near Rio de Janeiro.

He was conducting research for a book on how to save the Amazon rainforest when he was murdered.

"Dom will be cremated in the country he loved, Brazil, which he had chosen as home," Sampaio told reporters after his funeral at the Parque da Colina cemetery.

"I would like to express my eternal gratitude to the Indigenous peoples, who are with us as loyal guardians of life, justice, and our forests," she added.

She revealed the couple had been planning to adopt two children from Brazil.

Sampaio said the family would be paying close attention to the murder of her husband and his colleague, and thanked the Indigenous people who

helped look for them.

"He was killed because he tried to tell the world what was happening to the rainforest and its inhabitants," said Phillips' sister, Sian.

Outside the cemetery, some people protested with signs reading "Who ordered to kill Dom and Bruno?"

How did the two men go missing?

The disappearance of Phillips and Pereira on June 5 sparked an international outcry.

Phillips, 57, and Indigenous expert Bruno Pereira, 41, were killed on their boat on the Itaquai River, near the entrance of the Javari Valley Indigenous Territory, which borders Peru and Colombia.

Their remains were found in the jungle roughly 10 days later.

Three fishermen from nearby communities were arrested. Two of them confessed to the murders, according to the police. Five others who helped hide the bodies have also been identified.

Some activists have blamed the killings on President Jair Bolsonaro for allowing commercial exploitation of the Amazon at the cost of the environment and law and order. **mw**

GREENHOUSE GAS

Australia's emissions rise in 2021: Report

CANBERRA: Australia's greenhouse gas emissions increased in 2021, government data has revealed.

According to the National Greenhouse Gas Inventory update for December 2021, which was published on Monday, Australia produced 488 million tonnes of carbon dioxide in 2021, an increase of 0.8 per cent from 483.9 million in 2020.

Emissions from the electricity sector fell by 4.2 per cent due to an increase in renewable energy but were offset by increases in transport and manufacturing emissions as travel increased. Agriculture emissions increased 4.2 per cent as the industry continued to recover from drought.

Chris Bowen, the minister for climate change and energy, said the data reflected the former Coalition government's failure on climate policy.

"Their failure to deliver proper climate policy over a decade undermines the great strides in emissions reduction made through household solar, the Renewable Energy Target and state-based renewable schemes in the electricity sector over recent years," he said in a media release.

"Good climate and energy policy is good economic policy -- it doesn't rely on recession and drought for short term and temporary emissions reduction."

Compared to 2005, the benchmark for Australia's emissions reduction targets, emissions were down 21.4 per cent. **mw**

England score 7-wicket win over New Zealand

Joe Root (86*) and Jonny Bairstow (71*) guided the hosts to a thumping win over the Kiwis

LEEDS : England Test team began the Stokes-McCullum era with a dominant clean sweep over New Zealand, with powerful knocks from Joe Root (86*) and Jonny Bairstow (71*) guiding the hosts to a thumping seven-wicket win over the Kiwis in the final Test at Headingley in Leeds on Monday.

England were at their dominant best in the match. Though New Zealand set a challenging 296 runs to win, the English batters responded with some beautiful hitting, sealing the match by seven wickets and the series by margin of 3-0.

Chasing 296, England was not off the finest start, opener Alex

Lees was run out for just 9 at the team's score of 17. Zak Crawley and Ollie Pope resumed the chase for England. Their promising stand was cut short at 34-runs after Crawley was dismissed for 25 by spinner Michael Bracewell after being caught by skipper Kane Williamson.

From then on, Ollie Pope and Joe Root took complete control of England innings. The duo hit the bowlers around the park. Pope and Root continued their good run in the series, getting to their half-centuries.

The 134-run stand between the duo ended after Southee clean bowled Pope for 82 off 108 with 12 fours.

With England 185/3, The duo

of Root and Jonny Bairstow was at the crease. Root kept one end steady while Bairstow continued his explosive run in the second innings as well, bringing his half-century in just 30 balls.

The duo stitched a quickfire 111-run stand, earning their side a seven-wicket win, with Root (86*) and Bairstow scoring an explosive 71 off just 44 balls.

Earlier in the innings, New Zealand were bundled out for 326. The duo of Daryl Mitchell (56) and wicketkeeper-batter Tom Blundell (88*) once again shined for the Kiwis. Tom Latham also scored a valuable 76.

Spinner Jack Leach was the star for England with the ball, taking 5/66 while medium-pacer

Matty Potts also shined with a brilliant 3/66. With this, New Zealand gained a 295-run lead, giving English a target of 296 runs to complete the clean sweep.

In the second innings, England had scored 360/10. Jonny Bairstow struck a delightful 162 while debutant Jamie Overton stole the show with a brilliant 97, stitching a vital 241-run stand with Bairstow which revived England's fortunes in the match after Boul reduced them to 55/6 initially.

The pace duo of Trent Boul (4/104) and Tim Southee (3/100) shined for the Kiwis in the second innings. But at this point, England had gained a 31-run lead in the match.

Spinner Jack Leach stole the show in the first innings as well, taking 5/100. Stuart Broad also took a great 3/62.

Jack Leach was adjudged as the 'Man of the Match' for his brilliant 10-wicket haul. Joe Root was named as the Man of the Series. He scored 396 runs in the series.

Brief Scores: England 360 and 296/3 in 54.2 overs (Joe Root 86*, Ollie Pope 82, Tim Southee 1/68) defeated New Zealand 329 and 326. -DNA

FC Barcelona unveil Olympic gold inspired away kit for 2022-23

BARCELONA: FC Barcelona has unveiled its second strip for the 2022/23 season, which, like the first, is inspired by the Olympics.

This one focuses on some of the most iconic elements of the Games, such as the Olympic rings and gold medals, the most treasured of all Olympic items and which athletes from all over the world strive to win. Hence, the colour of gold is the absolute protagonist of the new design, which also includes the pattern of the map of Barcelona, highlighting the Eixample, Montjuic and Barceloneta in homage to the 1992 Games while the trim at the end of the sleeves features the colours of the five Olympic rings.

The golden colour also symbolises all the values that go into winning an Olympic gold medal, such as tenacity, ambition, effort and the constant quest for self-improvement, and also how gold medal winning athletes set the standard for others to aspire to.

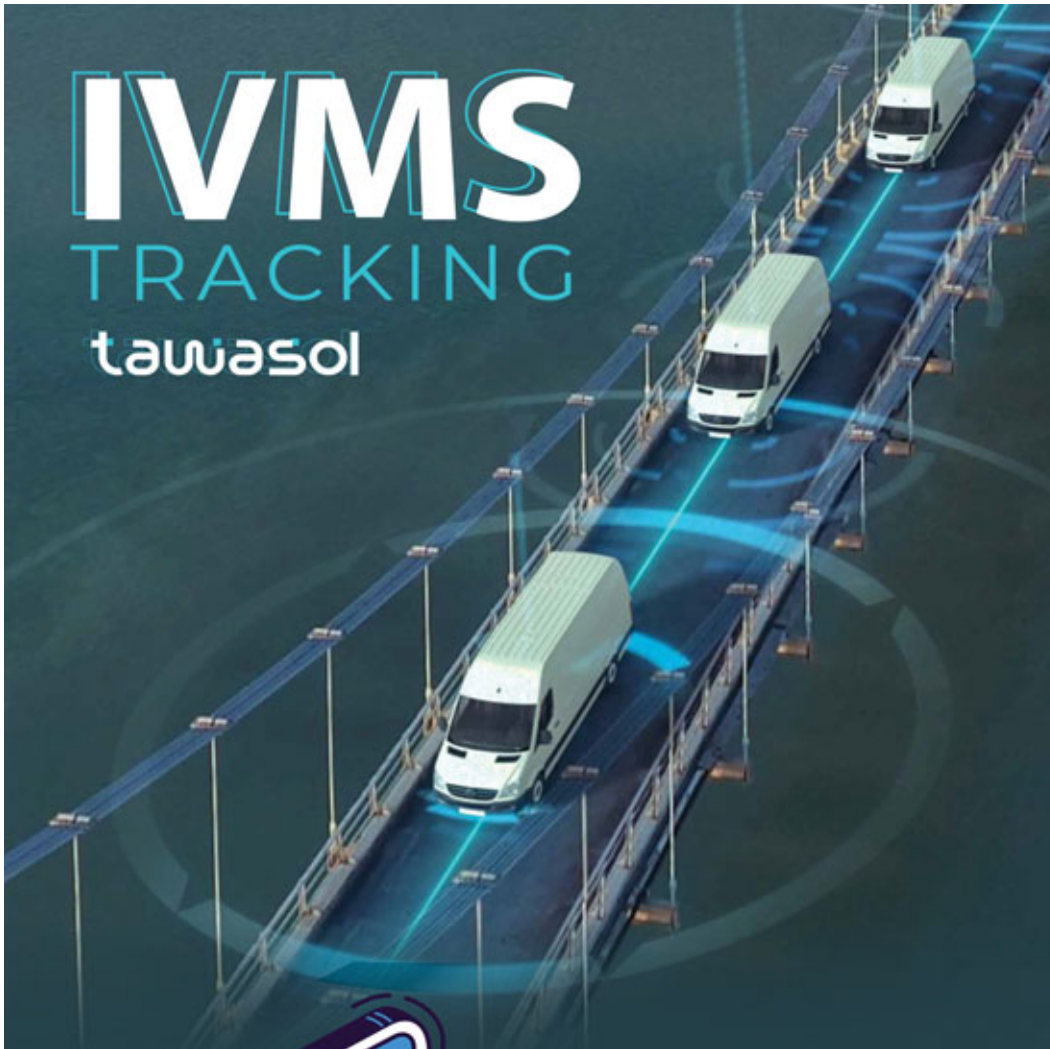

FC Barcelona also wanted the second strip to be a special nod to the women's football team, which in recent years has gone on a journey that embodies all these values.

In the last two seasons, the team won a historic treble including their first-ever UEFA Champions League title, and this season not only won the domestic treble but also set two consecutive world records for attendance at a women's football match, filling the Camp Nou for the quarter-final of the Champions League against Real Madrid and doing so again for the semi-final against Wolfsburg.

Like the home kit, the Barca's away strip is also being presented under the tagline 'The Flame Lives On', evoking the way that the Olympic spirit that drove the city of Barcelona into a new era is still burning and a part of the everyday lives of men and women in the Catalan capital. -ANI

COMMENTARY

Kohli, the right man to lead India in the final test

Anis Sajan, Vice Chairman, Danube Group

Indian team is already in England to finish the last test match which could not take place in 2021 due to few players of Indian team testing positive.

A lot has changed in one year's time with Virat Kohli stepping down as test captain after he was axed as ODI captain.

Rohit Sharma was made the captain and KL Rahul is his deputy. Now, with Rohit Sharma testing positive and KL Rahul unavailable for the last test at Birmingham, who will captain team India in the deciding test match?

There have been talks that Jasprit Bumrah might be handed over the captaincy. Some say it might be Rishab Pant. Both players are vital cog of the Indian team and are the X factors if India has to win the game. Why would you put them in a spot to lead India in a test match which can decide which way the series will go.

World Cup
England have been playing a different brand of cricket this summer under new captain Ben Stokes and recently appointed coach Brendon McCullum which is fearless and Gungo ho type similar to what they played under Eoin Morgan in the ODI which made them win the World Cup in 2019.

The fear of losing is not there and they are taking the attack to the opposition and New Zealand just could not cope up with this new approach. England have already won the test series and made a clean sweep of the test series.

So who is the best man to take the rampaging team

England on their home turf? You don't have to look anywhere when you have Virat Kohli in the team whose aggressive approach is unmatched and unparalleled. He is the one who changed the way India played test cricket and won 40 test matches with his aggressive style of captaincy.

His style had rubbed on his team mates and India always played to win and never feared losing.

But will Virat Kohli agree to lead the side after stepping down? That's the big question as he is still feeling hurt after he was removed as ODI captain which lead him to step down as test captain after the South Africa series.

But this is the best opportunity for the selectors and Virat Kohli to have a direct conversation and bury the hatchet. Time heals all wounds and who knows Virat Kohli might agree and lead the team.

Irrespective of the outcome of this all important test match if Indian selectors and Virat Kohli can keep team India forward, it would be a win-win situation for a nation which eats, sleeps and breathes cricket.

NET ZERO CARBON

Formula One pushing to net zero carbon target by 2030

LONDON: Development of a 100% sustainable fuel, slashing the use of single-use plastics and reviewing travel and freight logistics - these are some of the things Formula 1 is working on as part of its commitment to be net-zero carbon by 2030.

Three years ago, as part of a wider sustainability strategy, F1 set ambitious targets and have since been working with the 10 teams, race promoters, partners, suppliers, broadcasters and the FIA to reduce the sport's carbon footprint. Already F1 has reduced its carbon footprint through remote broadcast operations, which has enabled the company to reduce freight, while redesigned freight containers mean more efficient aircraft can be used to transport the equipment.

F1 offices are now using 100% renewable energy, with the company earning the highest sustainability management accreditation (3*) awarded by the FIA. Following the successful introduction of E10 fuel this season - comprising 10% ethanol, which will reduce CO2 emissions overall - F1 is working with partner Aramco and all the major fuel manufacturers in F1 to develop a 100% sustainable fuel to be introduced with a new engine formula in 2026.

It will be a drop-in fuel, so-called because it can be used in the same form in road cars in normal internal combustion engines. F1 will work closely with F2 and F3 to trial the sustainable fuels. Looking ahead, there are plans to build future F1 calendars to improve freight and travel logistics so the sport is moving more efficiently around the world.

"Carbon reduction measures for fans travelling to F1 events are being investigated, while more efficient travel arrangements will be assessed," Formula 1 in a statement said. -ANI

OMAN CRUDE PRICE RISES

The price of Oman oil has increased, with prices for delivery by August 2022 reaching \$110.26, said Dubai Mercantile Exchange (DME). The DME statement said that the price of Oman oil rose by \$3.75 from the price of Friday, which was \$106.51. - OMA

MSX INDEX ENDS LOWER

The MSX index closed at 4,116.95 points, down by 0.04 per cent from the previous close. The Sharia Index ended up by 0.05 per cent at 451.5 points. Vision Insurance, up 4.76 per cent, was the top gainer while Oman Chromite, down 9.89 per cent, was the top loser.

RESEARCH CENTRE

Aramco aims to accelerate low-carbon energy research

DHAHRAN: Saudi Arabian Oil Company (Aramco) inaugurated the Aramco Research Centre at KAUST (ARC KAUST), which aims to accelerate the development of low-carbon solutions for the energy industry using advanced analytics.

Strategically located within the King Abdullah University of Science and Technology (KAUST), the newly established research hub deploys artificial intelligence and machine learning to develop innovative ways to advance low-carbon solutions and enable a circular carbon economy.

The inauguration ceremony was attended by Aramco Senior Vice President Upstream, Nasir K. Al-Naimi, KAUST Vice President of Innovation and Economic Development, Dr Kevin Culen and senior executives from SABIC, Dow and PetroRabigh.

Aramco Chief Technology Officer Eng. Ahmad Al-Khowaiter said, "The Aramco Research Center at KAUST offers a unique opportunity to strengthen our collaboration with KAUST and accelerate the development of cutting-edge technologies that will contribute to a low-carbon future. Today energy companies face the dual challenge of delivering sustainability and reliability. The critical research undertaken at this new facility will help us meet our obligations to customers and energy consumers worldwide, while also supporting our ambition of reaching operational net-zero emissions by 2050."

ARC KAUST researchers, engineers and scientists intend to develop new technologies in carbon capture, low-carbon hydrogen/ammonia, non-metallics, e-fuels. -SPA

IN SUR INDUSTRIAL CITY

Pact inked to set up OMR83mn tyre recycling plant

Times News Service

MUSCAT: Sur Industrial City, affiliated with the Public Establishment for Industrial Estates (Madaayn), has signed an investment contract with Al Fairuz Projects and Investments, to establish a rubber powder production plant with an investment value touching OMR83 million for phase one of the project.

Eng. Abdulqadir bin Salim Al Balushi, Director-General of Sur Industrial City, stated that this eco-friendly project will be devel-

oped on an area of 230,000 sqm and will adopt cutting-edge tyre recycling technologies. "The tyre recycling project is expected to generate 212 job opportunities, of which 75 per cent will be for Omanis," Al Balushi informed.

Eng. Ahmed bin Mohamed Washah, Executive Director of the project, pointed out that the rubber powder production plant will be beneficial for the manufacturing industries that use biofuel and carbon, as they will be extracted utilising advanced and environmentally friendly technology rather than

This eco-friendly project will be developed on an area of 230,000 sqm

harmful tyre burning.

The project establishment phase is expected to commence during the last quarter of the current year, and the two-year planned construction phases will kick off in the first half of next year.

MANUFACTURING SUMMIT AND AWARDS

Summit highlights consumer-driven manufacturing, connected services

MUSCAT: Oman Economic Review (OER) organised the Manufacturing Summit and Awards 2022, themed 'Smart Manufacturing: Enhancing competitiveness, innovation and transformation'.

The event focused on consumer-driven manufacturing, connected services, smart factories, industry 4.0, the digital economy, sustainability, hyper-automation, real-time performance monitoring, lead time compression (order-to-cash), speed up a time to market, supply chain cost and reliability (inventory turns and cash conversion cycles), eliminating profit leaks across the value chain, leveraging data and analytics for superior customer insights, educating and up-skilling in quality and lean manufacturing practices, as well as improving quality levels to achieve world-class performance.

The summit's opening ceremony was held under the patronage of

AIR POLLUTION REDUCTION HELPS IN BRAIN DEVELOPMENT OF CHILDREN

ACCORDING TO A RECENT STUDY, HAVING A PORTABLE AIR CLEANER AT HOME CAN HELP IN REDUCING THE IMPACT OF AIR POLLUTION ON CHILDREN'S BRAIN DEVELOPMENT.

90%

of the world's population breathes air with particulate matter concentrations above the WHO guidelines.

Study results indicate that reducing exposure to air pollution during pregnancy could improve children's cognitive development around the world.

The findings of the research were published in the journal 'Environmental Health Perspectives'. Simon Fraser University researchers collaborated with U.S. and Mongolian scientists to study the benefits of using air filters to reduce exposure to air pollution during pregnancy and assessed the impact on children's intelligence.

The researchers note that their randomized controlled trial is the first study of its kind to document the impacts of air pollution reduction on cognition in children.

Beginning in 2014, the team recruited 540 pregnant women in Ulaanbaatar, Mongolia to participate in the Ulaanbaatar Gestation and Air Pollution Research (UGAAR) study. Ulaanbaatar has some of the worst air quality in the world, well-exceeding guidelines set by the World Health Organization (WHO).

The women were less than 18 weeks into their pregnancies and non-smokers who had not previously used air filtering devices in their homes. They were randomly assigned to either the control or intervention group. The intervention group was provided with one or two HEPA filter air cleaners and encouraged to run the air cleaners continuously for the duration of their pregnancies. The air cleaners were removed from the home once the child was born.

The researchers later measured the children's full-scale intelligence quotient (FSIQ) at four years of age using the Weschler Preschool and Primary Scale of Intelligence.

They found that the children born to mothers who had used the air cleaners had an average FSIQ that was 2.8-points higher than the group that did not use an air cleaner during pregnancy.

"These results, combined with evidence from previous studies, strongly implicate air pollution as a threat to brain development," says Ryan Allen, professor of environmental health in SFU's Faculty of Health Sciences. "But the good news is that reducing exposure has clear benefits."

Children in the intervention group also had significantly greater average verbal comprehension index scores, which is consistent with results from previous observational studies. The research suggests that a child's verbal skills may be particularly sensitive to air pollution exposure.

More than 90 percent of the world's population breathes air with particulate matter concentrations above the WHO guidelines. The researchers suggest the population-level impact of air pollution on brain development could be substantive even if the individual-level effects are modest.

Their study results indicate that reducing exposure to air pollution during pregnancy could improve children's cognitive development around the world.

"Air pollution is everywhere, and it is preventing children from reaching their full potential," adds Allen. "Air cleaners may provide some protection, but ultimately the only way to protect all children is to reduce emissions." -ANI

Air pollution is everywhere, and it is preventing children from reaching their full potential. Air cleaners may provide some protection, but ultimately the only way to protect all children is to reduce emissions.

OMAN SAIL'S YOUTH TEAM HEADS TO TÜRKIYE FOR THE OPTIMIST WORLD CHAMPIONSHIPS 2022

MUSCAT: Five members of Oman Sail's youth sailing team will compete in Optimist World Championship 2022. Organised by the B. B. Bodrum Sailing Club and Turkish Sailing Federation, under the authority of the International Optimist Dinghy Association (IODA), the team will be part of a fleet of 286 sailors representing 62 countries when racing gets underway from 27 June to 7 July 2022.

Alongside coach Suhail Al Mayahi and Team Leader Abdulaziz Al Shidi, the team of Ibrahim Al Bulushi, Hood Al Nofli, Hasan Al Wahaibi, Abdul Rahman Al Hadi and Tamim Al Balushi will be aiming to put their preparations into practice. Oman Sail's Head of Youth Sailing Pathway, Mohsin Al Busaidi, the first Arab to sail non-stop around the world, will also be travelling to Bodrum to represent the nation.

Abdulaziz Al Shidi, Optimist Team Leader, said, "The Optimist World Championships are the pinnacle for young sailors in this class and we are confident that our team will be able to perform at their very best. This is an important step in their journey as sailors and it will be a great experience to sail with, learn from and compete against sailors in their age group from around the world."

Suhail Al Mayahi, Oman Sail Youth Coach, said, "The World Championships in Bodrum mark the start of a busy period for our young squad but we have prepared well, trained hard and made pro-

Oman Sail's youth sailing team will be part of a fleet of 286 sailors representing 62 countries when racing gets underway from 27 June to 7 July 2022.

gress throughout the season already. Conditions will be excellent and it will be a strong fleet of the best Optimist sailors in the world, and a good test for us as we look to develop well-rounded and skilled athletes and gain experience in a competitive environment."

Following the Optimist World Championships in Türkiye, the team will head to Sønderborg, Denmark, for the Optimist European Championships from 30 July-6 August.

KHALIFA STADIUM

A FITTING VENUE FOR A GRAND EVENT

Pankaj K Sharma

DOHA: The iconic Khalifa International stadium is all geared up to host Qatar World Cup 22 matches. Rising like a Phoenix from the otherwise mellow surroundings, the colourful lights during the nights present a brilliant spectacle to the eyes. The huge stadium is ready to accept the world's biggest sporting event and the fans with an open heart.

With surrounding areas simmering at over 45 degrees Celsius, the temperature drops by more than 25 degrees Celsius the moment you enter the stadium. Giant blowers installed at the stadia take care of the summer heat. One feels quite comfortable inside the stadium and the green turf seems almost ready to hold the month-long world cup extravaganza.

This man-made facility is something sort of a miracle as no one had expected that temperature inside an open stadium can be controlled through cutting-edge technological tools.

But engineers have made it possible. A dress rehearsal of the opening extravaganza was presented at a gala dinner organised by the Qatar Airways at the stadium. The breathtaking fireworks were simply majestic. It gave a glimpse of the show in store. Local citizens also gave a stupendous performance and brought alive their rich heritage, apart from two great violin shows by foreign artistes.

The entire show was planned to perfection with the guests giving a huge round of applause to the artistes. But the performance of Jennifer Lopez was like an icing on the cake. She sang some beautiful songs from her chartbusters that everyone left their seat and started grooving on her numbers. In the excitement to watch the Lopez show, many people ran on to the stadium pitch who were later cautioned by the organisers to immediately leave the zone.

“
The huge stadium is ready to accept the world's biggest sporting event and the fans with an open heart.

NMC Speciality Hospitals in Ghubra and Al Hail achieve JCI Accreditation

The JCI accreditation reiterates NMC’s constant endeavour to provide the patients with the highest quality of care and to ensure patient safety in each aspect

MUSCAT: NMC Healthcare Oman has announced that both NMC Speciality Hospitals - Ghubra and Al Hail have officially received accreditation from Joint Commission International (JCI)

- the Gold standard recognition in the healthcare sector for best practices in quality and patient safety. The JCI accreditation reiterates NMC’s constant endeavour to provide the patients with the highest quality of care and to ensure patient safety in each aspect.

What is JCI?
JCI is the international arm of the Joint Commission for Accreditation of Healthcare Organisations

(JCAHO), USA. It is one of the oldest and largest standards-setting and accrediting bodies in healthcare that evaluates more than 20,000 organisations and inspires them to excel in providing safe and effective care. The JCI standards focus on areas that directly impact patient care such as patient experience and feedback, infection control, patient and family rights and patient awareness initiatives.

What is the impact of JCI?
To be accredited, the hospital is evaluated on more than 1200 standard elements in areas like medical expertise, staff qualifications, efforts to improve the quality of services, facilities management and safety and organisational leadership. This not only offers the hospital its health report but also helps the hospital to come to the same level of healthcare delivery as the hospitals in

the western countries are. Speaking on JCI accreditation, Dr Deep Makkar, Group General Manager, NMC Healthcare Oman said, “NMC Healthcare had commenced operations five years back in Muscat; and within this short period, we are one of the most recognized and sought-after healthcare providers in Muscat, serving patients across the nationalities. We have always focused on advanced technology and international standards of clinical care combined with the highest levels of quality.”

A team effort
Congratulating the team, Dr Deep continued “Patients are the centre of everything that we do and their safety & comfort is our number one priority making us a preferred healthcare services provider to the community. All medical programmes offered by us are underpinned by an uncompromising belief and practice of ethics, strict clinical governance, and excel-

lence. The JCI accreditation is a testimony to the efforts put in by every team member.” Dr Rajagopal Ranganathan, Medical Director - NMC Healthcare Oman said, “Both NMC Speciality Hospitals are comprehensive super speciality hospitals with highly qualified and trained medical and support teams. “Now, we have got an official attestation on our hospitals’ infrastructure to be at par with international standards. “Moreover, with MoH support, we follow globally benchmarked standards of medical, nursing, and operating protocols making it the preferred healthcare destination for patients from around the region. The hospital director said it carried tertiary-level capabilities with a Centre of Excellence each in the realms of cardiology, orthopaedics & spine, bariatrics, gastroenterology, neurology, lap & minimal invasive surgery, obstetrics & gynaecology, among others.

EXHIBITION

Oman Health Conference from September 26-28

MUSCAT: The demand for healthcare facilities and medical supplies has drastically increased in the Sultanate of Oman, as the nation witnessed a rapid recovery from the COVID-19 pandemic. To give impetus to the healthcare industry, the 13th edition of the Oman Health Exhibition & Conference (OHEC) will be held in person from September 26-28 at the Oman Convention & Exhibition Centre, Muscat, Oman. OHEC is Oman’s leading exhibition and conference for the health and medical sector providing a networking and business-centric event platform for professionals from the hospital infrastructure, pharmaceuticals, healthcare, medical supplies, medical tourism, medical technology, laboratory equipment, instruments and services, international hospitals, health, and medical centres. The event will welcome more than 150 local and international participating companies from the Czech Republic, Iran, India, Oman, Poland, Thailand, Turkey, and UAE and over 5,000 healthcare professionals and buyers from across Oman and the Middle East region during three days of networking and knowledge exchange sessions. Despite the recent challenges caused by the spread of COVID-19, the pandemic provided an opportunity to expand the existing healthcare system and adapt a resilient approach. Some of the major factors responsible for Oman’s rapid and efficient response in curbing the pandemic were the expansion of the healthcare system and an efficient vaccination campaign. As outlined in the Oman Vision 2040, health is a national priority leading to remarkable advances in the sector. The rising investment in the public and private medical sector in the Sultanate is witnessed with the opening of the SQU Cancer Centre, Hematology Centre, Ministry of Health Diabetic Centre, Oncology Centre, Hyperbaric Oxygen Therapy Centre, Cardiac Cen-

tre, Genetic Centre at The Royal Hospital, IVF Centre at Khoulia Hospital, and similar centres in other governorates of Oman. Ashley Roberts, General Manager, CONNECT - the Organiser of Oman Health Exhibition & Conference in partnership with the Ministry of Health Oman states, “COVID-19 pandemic has resulted in realising the importance of investing in the sound healthcare system. With advancements in healthcare technology, increasing awareness of personal fitness and wellness, and the importance of pre-emptive measures to address health-related issues, Oman Health Exhibition & Conference is set to highlight

the demand for healthcare and innovative technologies. In three days of business networking and knowledge exchange in a face-to-face environment, the event will facilitate the industry to reconnect and collaborate for the development of the industry.” In addition to the exhibition showcase, the Oman Health Conference will continue to present fresh insights into the evolution of health and medical sectors post COVID-19. The free-to-attend conference is organised by the Oman Medical Association in partnership with the Oman Ministry of Health where renowned speakers, policymakers, practitioners, academicians, researchers, advocacy groups, influential policymakers and industry experts will participate to discuss policies, and public health challenges and solutions in a global context. The highly acclaimed conference will facilitate discussions on a wide range of topics related to improving health at all levels through collaboration and open dialogues. Industry stalwarts specialising in the field of medical science will address the latest findings to improve research, education, healthcare, and policy outcomes in the region; and discuss opportunities, challenges, and solutions to grow the healthcare industry.

ISLAMIC CORPORATE INTERNET BANKING

Ahli Islamic launches ‘IslamiNET.’ New-age digital platform for corporates

MUSCAT: Perusing its mission to create innovative banking solutions for the future, Ahli Islamic has continued to launch digital initiatives that fulfil the needs of both individual and corporate customers. Among the many successful initiatives launched as part of the bank’s digital roadmap is the Islamic Corporate Internet Banking, also known as IslamiNET, an online portal that has been specifically designed to support corporate customers with seamless transactions that facilitate ease of business. Yousef Al Rawahi, Deputy General Manager and Head of Ahli Islamic said, “Digital transformation is one of our key growth driving factors. Our digital transformation strategy considers both the operational productivity of the bank as well as the enhancement of services that it provides to our customers including retail, private banking, SMEs, and corporates. Committed to delivering a seamless customer-centric experience that Ahli Islamic has become known for, we have

created IslamiNET as a time-effective, hassle-free service that comes with the Sharia-compliant stamp. Building on the power of innovative and technological advancements, IslamiNET is a bi-lingual online portal, which provides multiple services that allow straightforward user access control and enable the customer to perform tasks efficiently. The impressive features include easy fund transfers, bulk payments, WPS and salary transfers, PASI and bill payment for customers in the corporate sector, as well downloading statements among a list of other services. Commenting on the addition of IslamiNet to the bank’s corporate segment, Al Rawahi adds, “IslamiNET is a great addition to our portfolio of offerings in the corporate segment. Tailored to meet the demands of the discerning corporate customers, IslamiNET is a convenient, accessible, secure, fast, and Sharia-compliant banking solution that helps accelerate our customers’ digital transformation journey.”

LOW EMI

Attractive EMI available on family sedan Nissan Altima

MUSCAT: Suhail Bahwan Automobiles (SBA) has announced a low EMI on the Nissan Altima model known for its excellent drive, superior handling, fuel efficiency and thoughtful technology solutions. Customers can now avail of an exceptionally low EMI rate of OMR 123 (terms and conditions apply). Starting EMI is calculated on the price of the SV variant with a 20% down payment, and a 3% rate of interest for 10 years loan tenure through Bank Muscat. Subject to credit approvals. Nissan Altima is cherished by owners in Oman for its good looks, a striking exterior, colour range, spaciousness and fashionable interior. A senior official of Nissan Oman said, “We are delighted to offer low EMI on a model that of-

fers effortless power while furnishing remarkable fuel economy. Its powerful high-performance engine and a range of other options add to its appeal. Creating a new standard of design, driving enjoyment and technology within the mid-size sedan segment, Nissan Altima features expressive styling, an uplifting interior, two power-trains, and advanced Nissan Intelligent Mobility features.” Customers can avail low EMI rate as part of the offer. Starting EMI for Nissan Altima is OMR 123. Starting EMI is calculated on the price of the SV variant with a 20% down payment, and a 3% rate of interest for 10 years loan tenure through Bank Muscat. Subject to credit approvals. All customers purchasing Nis-

san Maxima will be eligible for a free periodic maintenance service package for 3 years / 60,000 km (whichever is earlier), limited to six services only. This offer includes only the service intervals of 10,000km. All customers purchasing Nissan Maxima during this scheme period will be eligible for free first-year vehicle insurance (Oman and UAE only). All customers purchasing Nissan Maxima during this scheme period will be eligible for free first-year vehicle registration. As per a loyalty programme, all Nissan existing owners and their immediate family members (father, mother, son(s) and unmarried daughter(s)) will be eligible for additional benefits on the purchase of a second Nissan vehicle.
